WWW.DAF.COM.AU
The XF105 is ideal for long-distance haulage applications. With a clever chassis design, attractive exterior and the most spacious cab in its class, the XF series sets the bar for driver comfort. Available in rigid and prime mover configurations with an economic 12.9 litre PACCAR MX engine as standard, the DAF XF has the power to perform.

**THE XF105**

**STYLISH**
With its elegant and distinctive appearance, the XF105 is the calling card for every transport operator. It includes a stylish lower grille, which extends to the bumper to channel maximum airflow for exceptional engine performance. The integrated, aerodynamic exterior sun visor (available in the Super Space Cab) and optional integrated skylights add an extra touch of style.

**EFFICIENT**
The XF105 offers low running costs and high efficiency, featuring carefully balanced, integrated and optimal driveline technology. High rear-axle ratios give the XF105 the best combination of performance, efficiency and low tare weight. Selective Catalytic Reduction (SCR) technology delivers Euro 5 emission requirements, and the aerodynamic skirts and fenders contribute to a further reduction in fuel consumption.

**ROBUST**
The robust XF chassis is made with high quality steel, resulting in an exceptionally strong but lightweight design for high payloads. The steel bumper increases protection and reduces the risk of any front-end damage during collisions. Likewise, the headlights are made of high impact-resistant Lexan to help give operators a damage-free driving experience.

**VISIBLE**
The large windscreen and door windows offer the driver an excellent, clear view. Electrically adjustable side-view (heated) mirrors, curb-view mirror, side-view camera system (optional) and Xenon headlights (optional) also contribute to a large field of vision for all driving conditions. Corner air deflectors guide the airflow along the cab to keep the door handles and side windows clean.
SAFETY

The XF105 combines the very best in safety and assistance systems to support the driver and reduce the risk of accidents. The optional Vehicle Stability Control (VSC) helps to prevent jack-knifing and roll over, and keeps the driver safely in control. Adaptive Cruise Control (ACC) helps the driver to maintain a safe distance from the vehicle ahead, and the optional Lane Departure Warning System (LDWS) provides assistance if the vehicle inadvertently drifts out of its lane or danger arises when changing lanes. DAF’s unique Night Lock (optional) effectively protects against break-ins and theft.

ULTRA-SPACIOUS

The Super Space Cab sets the standard in driver comfort with a standing height of 210cm. It offers that feeling of contemporary luxury with enough storage space to install a 42-litre refrigerator drawer (optional). The sleeping area offers an option of two spacious bunk beds, which can easily be transformed into a comfortable sofa to sit at the retractable dashboard-mounted table. There’s more space, more flexibility and greater comfort to provide the very best for relaxation; a home away from home.

ERGONOMIC

Slipping into the driver’s seat behind the multi-functional steering wheel (optional), it becomes clear the XF was designed for ergonomic ease of operation. Virtually no truck in its class inspires more; the subtle, ambient lighting and dashboard have been specially created with the driver in mind, with all instruments and controls within reach to help drivers bring critical situations under control in the most comfortable way.

POWERFUL

The ultramodern 12.9 litre PACCAR MX engine provides the ultimate balance of power and fuel economy. It delivers outputs of 375 kW/510 hp and maximum torque of 2,500 Nm, which is available between 1,000 and 1,410 rpm. Ultimately the MX is calm and intelligent, while still having the power to perform.

DURABLE

The XF105 has been designed and developed for optimum durability. The cylinder block and cylinder head are made from Compact Graphite Iron to further improve reliability, while overall fewer parts provide longer service intervals, prolonging the lifetime of the XF105.

*Only on single trailer application.

Global strength, local know how

PACCAR Inc., a Six Sigma company, is a global technology leader in the design, manufacture and customer support of high-quality light, medium, and heavy-duty trucks under Kenworth, Peterbilt and DAF brands. PACCAR also designs and manufactures advanced diesel engines, provides financial services and information technology, and distributes truck parts related to its principal business.

Tailor-made financial services

PACCAR Financial is dedicated solely to the trucking industry. With more than 35 years’ experience in the Australian transport industry they understand today’s business and continue to support it with innovative loan and lease options. The right financing can be as important to your success as the right truck, so talk to PACCAR Financial about tailoring a financial solution to meet your needs.

Provides premium trucks and personalised service

PacLease offers short and long term rental and leasing solutions with exceptional service, experienced technicians and local franchise support, that can help manage your fleet operations. PacLease delivers premium medium and heavy duty DAF rental trucks to help lower your operating costs and provide a comfortable working environment for drivers with customised services that best suits your operation.

DAF dealer network

Wherever you are, you can count on the DAF dealer network to provide you with excellent parts, service and repairs for all DAF trucks and applications. With 43 dealerships across Australia – we’ve got you covered. Offering a wide range of services, from truck cleaning to total overhauls, your local DAF dealership has the specialist equipment, skills and know how to look after your truck.

Committed to DAF parts support

PACCAR Parts dealers offer an extensive range of parts and accessories and look after all your truck servicing needs. The national distribution centre at Bayswater in Victoria is one of the most modern and efficient in Australia and utilises advanced RF technology in supplying the dealer network. With more than 20,000 sq.m dedicated to DAF parts, cabs are stocked on the shelf and our original equipment manufacturer’s part identification number system means your replacement part will be picked accurately.
